PATENT VISES

M A N U F A C T U R E D B Y
PRENTISS VISE COMPANY
110 LAFAYETTE ST., NEW YORK, U. S. A.
FACTORY, ... WATERTOWN, N. Y.

NOTICE: OUR VISES ARE SOLD BY DEALERS EVERYWHERE

We desire to call attention of our patrons to the fact that our goods are imitated, in an inferior manner, by some unscrupulous manufacturers who try to dispose of their counterfeit product by assuring purchasers that it is "just as good as Prentiss," which assertion stamps itself as manifestly false and misleading.

We request, that when you favor us by ordering a

"PRENTISS VISE,"

or other vises of our manufacture, you will see that your dealer supplies a vise bearing our name or one of our Registered Trade Marks, which is conspicuously shown on every vise we make. We much prefer that our goods should be obtained through the regular trade, but if your nearest dealer does not carry them, and will not get them for you, we will supply them.

IN ORDERING, USE CATALOGUE NUMBERS

PRENTISS VISE CO., NEW YORK

CATALOGUE NUMBER FORTY-NINE

We take pleasure in inviting your notice to the

MOST COMPLETE AND LARGEST CATALOGUE AND PRICE LIST

of vises ever issued, trusting you will consider it worth preserving for future reference. For thirty years we have manufactured

THE PRENTISS VISE

We were pioneers in placing on the market well finished and properly constructed Vises, and we still maintain the lead, our goods being superior to any other make in style, finish and material. Recent additions to our already large factory, made necessary by the ever increasing demand for our goods, will enable us to hereafter promptly fill all orders with which we may be favored.

PRENTISS VISE COMPANY

Prentiss' Patent
Self-Adjusting Jaw Vises

Are of superior quality and workmanship, and possess **Manifest Advantages** over all others, and with our **Patent Swivel Bottom** and late improvements in manufacture, the **Prentiss' Vise** needs only to be seen to be approved; and being **complete in itself, without "attachments,"** it possesses, in addition to its own peculiar advantages, **all the merits** claimed for rival implements.

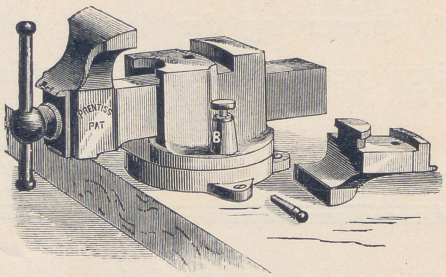

Figure 1.

Fig. 1 represents in detail an interior view of the mechanism of the **Prentiss' Self-Adjusting Jaw** with its supports.

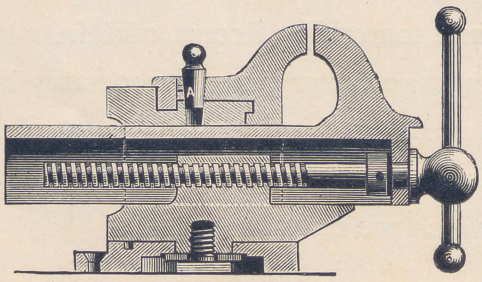

Figure 2.

Fig. 2 is a sectional view of the **Prentiss' Vise,** showing novelty and simplicity of its construction, from which may be readily seen there is nothing which can get out of order.

The **Back Jaw** of this **Vise** is **Self-Adjusting** and in use conforms by **Automatic Action** to any angle, **adjusts itself,** and makes firm the object held, whether it be **Straight, Bevelled** or **Wedged-Shaped.** By inserting pin A (see Fig. 3), the jaw becomes **Fixed,** thus making a **Parallel Solid Jaw Vise.**

The **Self-Adjusting Jaw,** resting and working as it does upon and against the **Solid Body of the Vise,** is thereby rendered absolutely as strong and durable as a solid jaw.

The **"Prentiss' Patent"** is the only **strong** and **durable** Self-Adjusting Jaw Vise in the market.

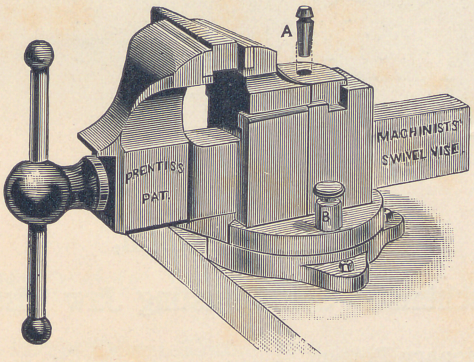

Fig. 3.—Prentiss' Patent Swivel Bottom.

Fig. 3. shows our **Patent Swivel Bottom,** by which the vise can be **instantly** adjusted to **right or left** at will of operator, by simply raising rachet pin B (see Fig. 3), which, on being freed, is instantly forced home by spring, thus rendering the vise **solid** and **firm,** at any desired angle.

Prentiss' Patent

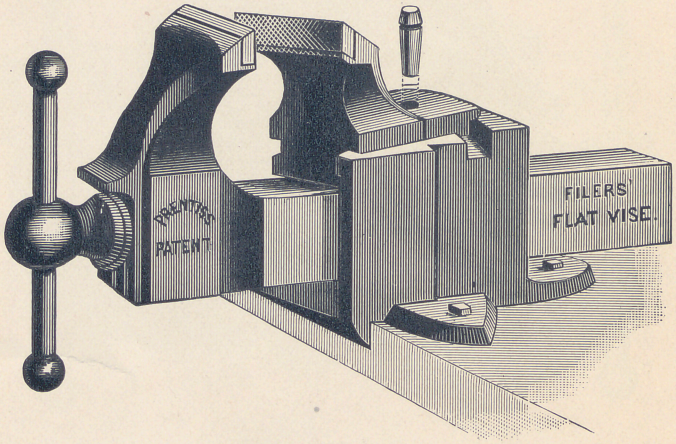
FILERS' or FINISHERS' VISE.



Stationary Bottom,

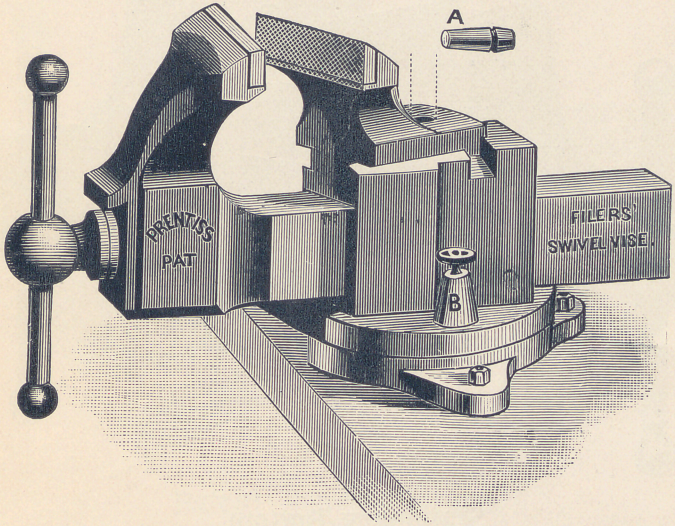
Filers' Self-Adjusting Jaw Vise.

These implements were especially designed and introduced to satisfy demand for a vise of this class, embracing the advantages of our Patent Self-Adjusting Jaw and Patent Swivel Bottom. The peculiarities of its construction are **lean, high jaws, long arm and large throat.** Rough-cut or smooth Jaws.

No. 42. Stationary Bottom, ... Price $ 8 00
4¼ in. Jaws. Opens 5¼ in. Weight 42 lbs.

Prentiss' Patent

FILERS' or FINISHERS' VISE.



Patent Swivel Bottom,

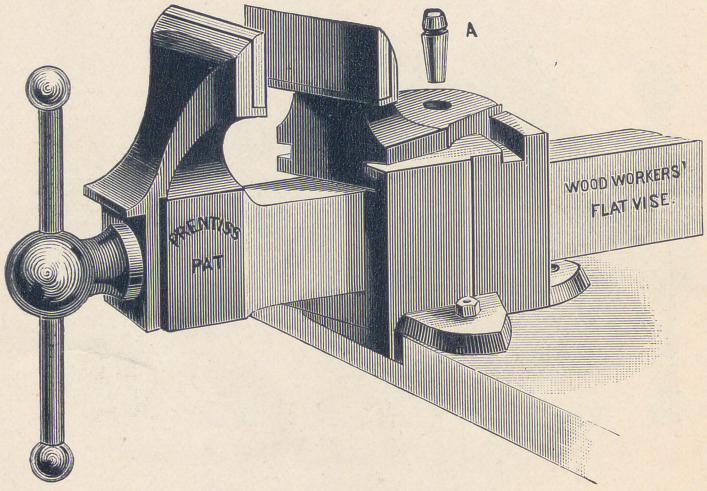
Filers' Self-Adjusting Jaw Vise.

We call especial attention to our **NEW MODEL** Filers' or Finishers' Vises, having **increased the weight** and **size** making them **the STRONGEST** vises of this style ever offered.

No. 47. Patent Swivel Bottom, ... **Price $10 00**
4¼ in. Jaws. Opens 5¼ in. Weight 47 lbs.

Prentiss' Patent

WOOD=WORKERS' VISES.



Stationary Bottom,

Coach-Makers' Self-Adjusting Jaw Vise.

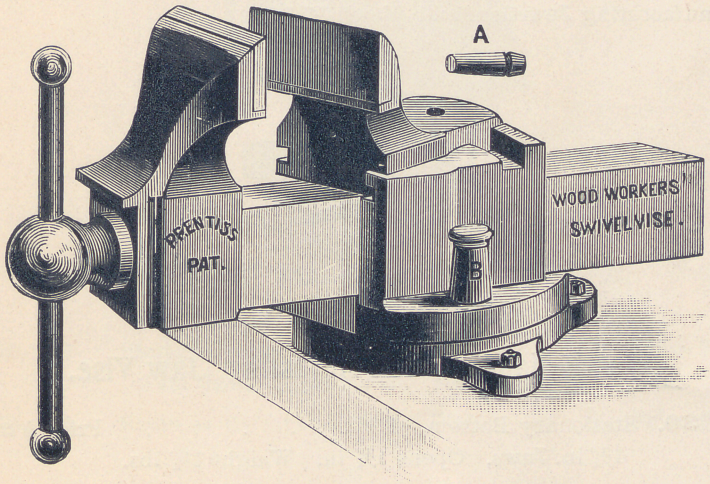
Our "Coach-Makers'" Vises, which are constructed upon the same principles as the Iron-Workers' before described, are acknowledged to possess many advantages over any other yet offered for use of Car and Carriage-Builders, Furniture Manufacturers, Pattern Makers and all Wood-Workers.

No. 12. Stationary Bottom, ... Price $ 8 00
3½ in. Jaws. Opens 7 in. Weight 30 lbs.

No. 10. Stationary Bottom, ... Price $11 00
4½ in. Jaws. Opens 9½ in. Weight 59 lbs.

Prentiss' Patent

WOOD=WORKERS' VISES.



Patent Swivel Bottom,

Coach-Makers' Self-Adjusting Jaw Vise.

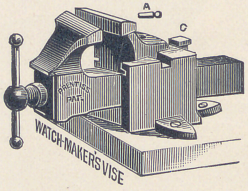
Our Self-Adjusting Jaw, combined with the Patent Swivel Bottom, makes the best vise ever offered artisans in wood, the large surfaces of the jaws (which are finished perfectly smooth) protecting the work from injury, while the Self-Adjusting Jaw easily and firmly holds articles of any shape.

No. 27. Patent Swivel Bottom, ... **Price $ 9 50**
3½ in. Jaws. Opens 7 in. Weight 34 lbs.

No. 26. Patent Swivel Bottom, ... **Price $13 00**
4½ in. Jaws. Opens 9½ in. Weight 67 lbs.

Prentiss' Patent
WATCH-MAKERS' VISES.

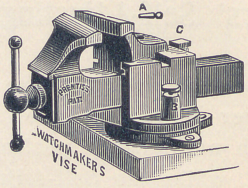
Our **Watch-Makers' and Jewellers' Vises** are made with **Cast Steel Square Anvil** (letter C), raised at the back, and **Jaws Rough-Cut** or **Smooth** as desired, being especially adapted to the uses of Manufacturing Jewellers and Watch-Makers.



Stationary Bottom,
Watch-Makers' Self-Adjusting Jaw Vise.

No. 30. Stationary Bottom, ... Price $ 3 50
1¾ in. Jaws. Opens 1¾ in. Weight 1½ lbs.

No. 31. Same as the above, **Nickel Plated,** . . . Price $ 5 75

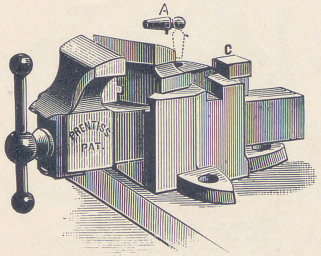


Patent Swivel Bottom,
Watch-Makers' Self-Adjusting Jaw Vise.

No. 35. Patent Swivel Bottom, ... Price $ 4 50
1¾ in. Jaws. Opens 1¾ in. Weight 2 lbs.

No. 36. Same as the above, **Nickel Plated,** . . . Price $ 6 75

Prentiss' Patent
JEWELLERS' VISES.



Stationary Bottom,
Jewellers' Self-Adjusting Jaw Vise.

No. 32. Stationary Bottom, ... **Price $ 4 00**
2 in. Jaws. Opens 2 in. Weight 3½ lbs.

Prentiss'
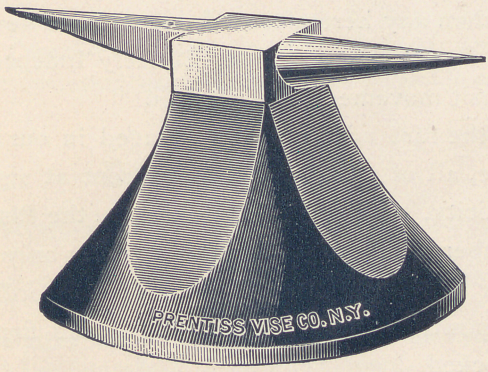
JEWELLERS' TABLE ANVILS.



No. 500. Painted Base. Anvil polished, each, 60 cents.
No. 502. Same, Fully Nickel-plated, " 80 "

These Anvils are made of the best quality of Cast Steel and are handsomely finished in every respect. The bases are made low and weighted at bottom to make them stand firmly on table.

Weight, 1¼ pounds. Height, 2 inches.
Each Anvil is neatly boxed.

Prentiss' Patent

RAPID TRANSIT VISES.

Attention of the trade, manufacturers and mechanics is called to the **Prentiss Vise Company's** superior **Rapid Transit Bench Vise.**

This vise has outlived several styles of quick-acting vises, and is giving better satisfaction than any such vise ever offered.

Our plan is new, and a better method for Rapid Transit movement than any heretofore offered and can be operated as a first-class Parallel Screw Vise, **Entirely Independent** of the Rapid Transit movement, if so desired.

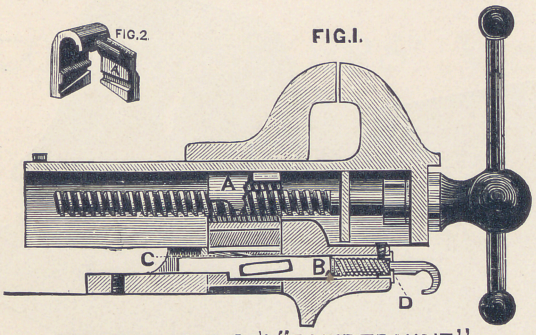
Among the rare advantages embraced in our new Rapid Transit Vise, all of which are self-apparent at sight, are extreme simplicity, strength and durability of the **Plan**—the very limited number of parts (there being actually only two pieces more in our Rapid Transit Vise than in an ordinary screw vise),—the positive action, great strength and firmness of the nut when locked.

By a single movement this vise may be opened or closed full length, and the nut will engage the screw at any point.

This is the only quick-action vise having full nut.

Prentiss' Patent Rapid Transit

PARALLEL VISES.



PRENTISS VISE Co's "RAPID TRANSIT"

The above is a sectional view of the mechanism of our New Patent Rapid Transit Invention.

Our plan is entirely new, and needs only to be seen to convince that it is the **Least Complicated, Most Positive, Simplest, Strongest** and best method for operating Rapid Transit Vise yet put in market.

DESCRIPTION.

Figure 1 represents half section of vise cut lengthwise through all parts.

A is one-half of our Rapid Transit Nut in place, disengaged from the screw.

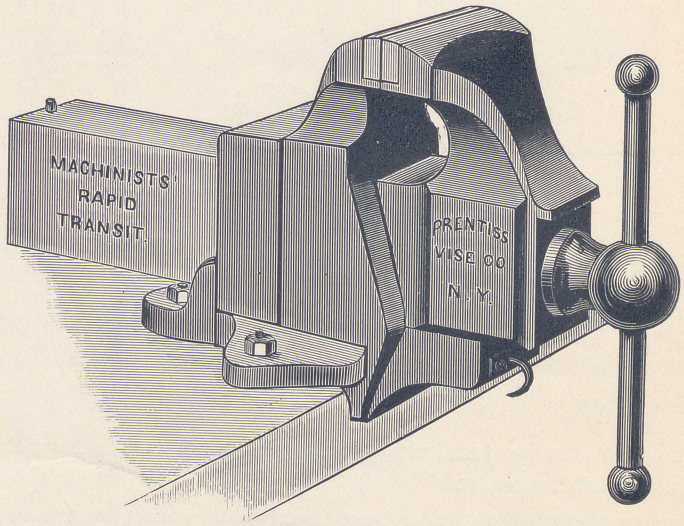
B is an **Operating Bar** carrying two **Inclines** or **Ledges** (all one piece), by which the nut is both opened and closed, and by the same movement is **firmly locked.**

C shows **Groove** in which **Incline** travels, thereby forcing one-half nut up and the other down simultaneously, on moving the **Bar** to front or rear one-half inch.

D is a **Ratchet Catch** on operating bar, which, when engaged, holds nut open.

Figure 2 shows the whole nut detached.

Prentiss' Rapid Transit MACHINISTS' VISES.



Machinists' New Rapid Transit Vise.

No. 70. Stationary Bottom, ... Price $ 6 50
3 in. Jaws. Opens 3½ in. Weight 22 lbs.

Prentiss'

SOLID JAW PARALLEL VISES

"BULL DOG."

(REGISTERED IN U. S. PATENT OFFICE.)

Our new and improved pattern **Solid Jaw** parallel **Machinists', Blacksmiths' and Wood-workers'** Bench Vises are placed in market under the trade name **"Bull Dog,"** which has been adopted by us to distinguish our vises from other similar goods.

In manufacturing the **"Bull Dog"** Vises only the best of materials, workmanship, and improved machinery will be made use of, and in style, finish, strength and durability, we believe them to be superior to any vises of this class heretofore offered; and we desire to call special attention of the trade to the following attractive features presented in connection with the **"Bull Dog" Vises**: They are not only of best pattern, best materials, best workmanship and finish, but also are sold at **Lower Prices** than any other first-class vise of this kind.

All Parts Duplicated on Call.

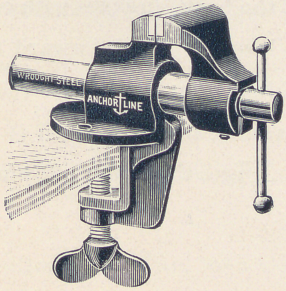
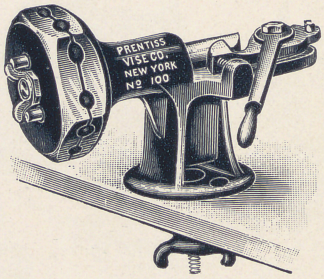
ANCHOR TABLE CLAMP VISE.



No. 301. Jaws 1¾ in. Opens 1¾ in. Weight 1¾ lbs. **Price $2 50**

Prentiss'

PATENT BICYCLE VISE.



Swivel Bench Vise.

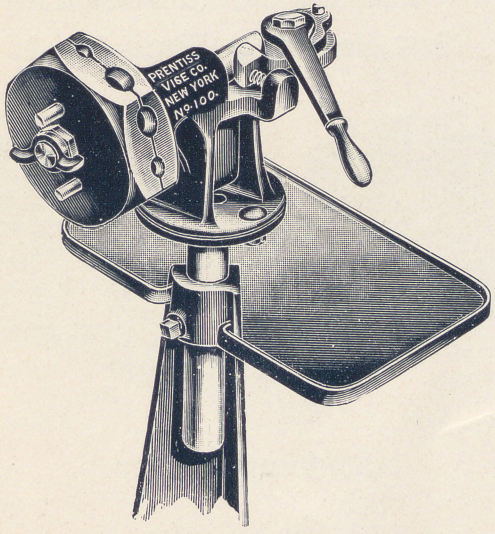
THE OPERATION OF THIS VISE IS VERY SIMPLE.

With one hand work is placed between the jaws, opposite its proper groove, while with the other the front jaw is closed, when the latch, shown on top of vise at the back, engages with corresponding notch in sliding stem; then the lever is pulled forward to draw the two jaws firmly together. Pushing lever back first relieves pressure on the jaws, not opening them fully, however, until it strikes pin shown on back of latch—this disengages the latter, allowing jaws to open automatically and instantly.

No. 100. Prentiss' Swivel Bike Vise, . Price $7 00

Prentiss'

PATENT BICYCLE VISE.



With Adjustable Stand and Tool Table.

Designed especially for Bicycle Factories and Repair Shops. The most convenient and quickest-acting vise made. Thoroughly up to date. Holds frames or tube in any position. The jaws, which revolve, are faced with lead to prevent marring work, and are grooved to accurately fit six different diameters, varying by eighths from $\frac{5}{8}$ to $1\frac{1}{4}$ inclusive.

The iron column or stand can be adjusted to any suitable height, and is furnished with tool table of ample size to conveniently hold all necessary tools.

No. 100. Prentiss' Bike Vise, with Column and Tool Table, ... Price $13 00

The New
BLAKE PIPE VISE.

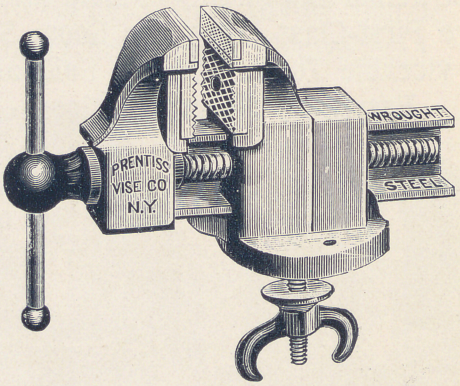
Prentiss' Improved

COMBINATION PIPE VISES.



PATENT APPLIED FOR.

Our Pipe Vise, as first constructed, has been in constant use during the last ten years in the largest pipe establishments requiring such tools, and has given unqualified satisfaction. We now offer it with our latest improvement

"The Wrought Steel (Channel) Sliding Bar,"

which makes it unbreakable and superior to all others.

The "Grip Plates" are made of best steel, carefully tempered, and are deeply serrated at right angles, forming innumerable points.

These heavy steel plate pipe jaws are reversible and interchangeable, and are full width of vise, thereby giving greater holding contact, with much less pressure on the pipe, than with old style concave jaws.

Pipe may be held at various angles and a slight turn of lever releases it. Capacity greater than other vises.

No. 81. Jaws 3½ inches, ... Price $14 00
Holds ⅛ to 2½ inch pipe. Weight 35 lbs.

No. 82. Jaws 4¼ inches, ... Price $20 00
Holds ⅛ to 4 inch pipe. Weight 55 lbs.

No. 83. Jaws 5 inches, ... Price $30 00
Holds ⅛ to 6 inch pipe. Weight 100 lbs.

Prentiss'

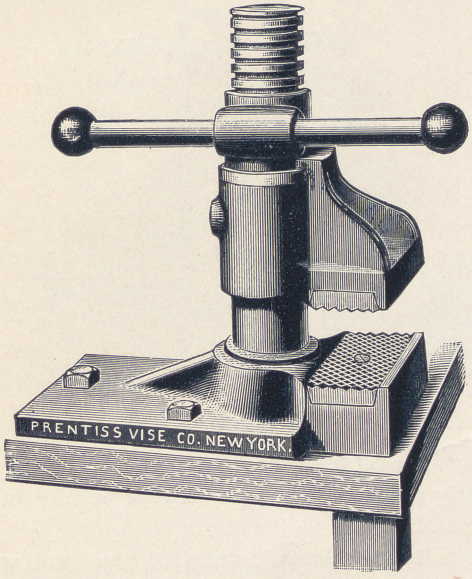
New Open Side Pipe Vises.



PATENT APPLIED FOR.

In presenting our New Open Side Pipe Vise which is constructed on an entirely new plan, we claim it to be the most complete, simple and strongest pipe vise in use, and also that it will hold pipe firmly with much less pressure than any other vise, thereby overcoming danger of crushing the pipe. It can be used on bench or post and will hold pipe in any position, requiring but half the space necessary for other vises.

See description of "Grip Plates" on page 36.

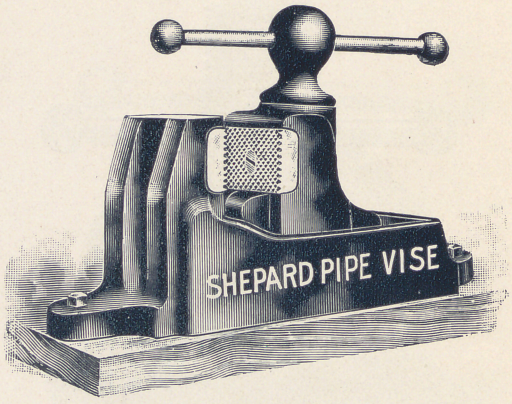
No. 85. Jaws 2¾ inches, ... Price $ 5 00
Holds ⅛ to 2 inch pipe. Weight 8 lbs.

No. 86. Jaws 3¼ inches, ... Price $ 7 50
Holds ⅛ to 3 inch pipe. Weight 18 lbs.

No. 88. Jaws 4¼ inches, ... Price $14 00
Holds ⅛ to 4½ inch pipe. Weight 40 lbs.

Shepard

PIPE VISES.



Pipe is free for removal from vise by a slight turn of lever.

Vise is instantly adjusted for any size pipe within its range by a simple movement of lever.

Will automatically grip long lengths of pipe and automatically release same by simply lifting pipe from between jaws. The gripping plates are vertical and will always remain free from scales and dirt. Each size of pipe has a different point of contact upon the gripping plates, lessening the wear and greatly increasing the length of time they will remain sharp.

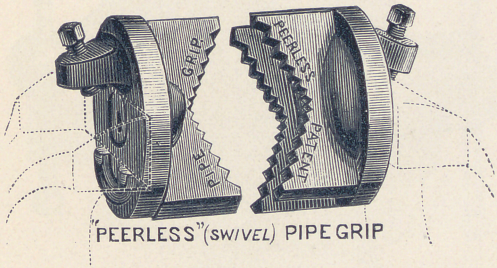
Pipe if drawn through the jaws rests upon frame of vise, avoiding wear and consequent dulling of the gripping plates, which are described on page 36.

These vises are warranted to grip pipe firmly, and to hold it satisfactorily.

No. 201.	Holds ⅛ to 2½ inch pipe.	Weight 18 lbs.	Price	$ 5 00
No. 202.	" ¼ to 4 " "	" 35 lbs.	"	9 00
No. 203.	" 1 to 6 " "	" 75 lbs.	"	16 00

New Peerless

PATENT PIPE GRIP.



New Improved (Swivel Jaw) Pipe Grip "Peerless."

MADE OF STEEL.

No. 1.	Fits any 3 to 4½ inch vise, ... Will hold ¼ to 2½ inch pipe.	Price $2 50
No. 2.	Fits any 4¾ to 5½ inch vise, ... Will hold ¼ to 5 inch pipe.	Price $2 75
No. 3.	Fits any 6 to 8½ inch vise, ... Will hold ¼ to 6 inch pipe.	Price $3 00

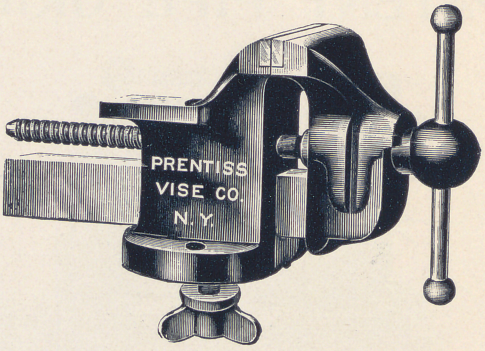
Having made recent improvements in the Peerless Pipe Grip, we now offer machinists, engineers, steam, gas and pump fitters, plumbers and blacksmiths, the most convenient tool ever made for holding pipes, thimbles, couplings, bolts, nuts, &c., at greatly reduced prices.

We are confident this new implement will supply a deficiency long felt by mechanics who have frequent use for a pipe grip, but are not warranted in purchasing an expensive tool for such purpose.

Being compact and light it is easily transferred from shop to outside work, and its ready adaptability to any vise used by machinists, blacksmiths, &c., makes it particularly acceptable in mining, oil or other sections remote from machine shops where it is invaluable and indeed almost indispensable.

Shepard

NEW STATIONARY VISES.



PATENT APPLIED FOR.

Can be used as either Stationary or Swivel Bottom Vise.

Each Vise is equipped with Central Bolt, Nut and Washer for fastening to Bench.

Is also provided with bolt holes for permanently securing to bench.

This is far superior to any other low-priced vise.

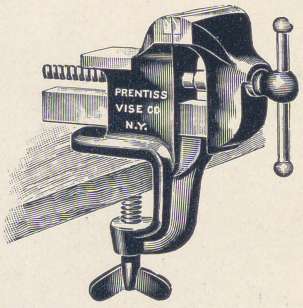
TABLE CLAMP VISES.



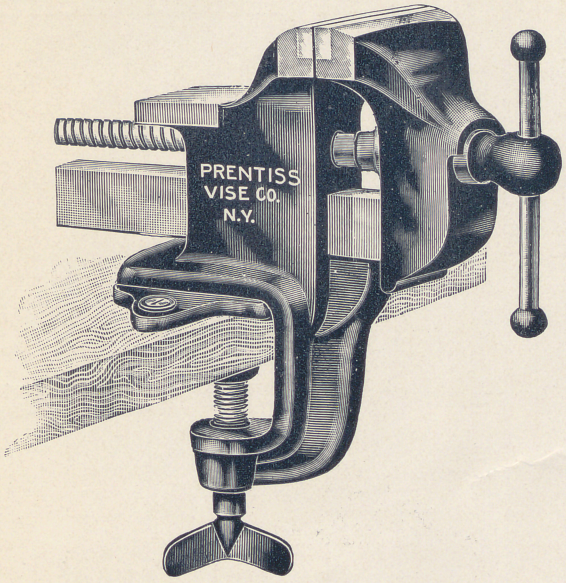
These vises have wrought steel sliding bars, screws and levers. The jaws are hardened and checked. Each vise is provided with handsomely polished anvil. The screws are large and smoothly cut. The clamp is very much heavier than on other makes of Table Clamp Vises, thus insuring against breakage. The vises are very highly finished.

We guarantee these "Shepard Clamp Vises," shown on this page and the page following, to be the strongest, best made, finest finished and most thoroughly satisfactory and attractive line of vises of this style ever offered on the market.

No. 152.	Jaws 1½ in.		Opens 1½ in.		Weight 1½ lbs.		**Price $**		30
No. 153.	" 1¾ "		" 1¾ "		" 2½ "		"		60
No. 154.	" 2 "		" 2 "		" 3 "		"		75

Shepard

LARGE CLAMP VISES.



This vise is provided with an extra seat or base, as shown in above illustration. This extra base is screwed to bench, vise then placed on it and thumb-screw tightened. As the depression in base fits the bottom of vise perfectly, the latter is held in place rigidly by simply making the thumb-screw moderately tight. It has heretofore been impossible to fasten large clamp vises securely, the effort to do so resulting, usually, in breaking the clamp. This device overcomes that trouble, and, at the same time, leaves vise free to be removed and replaced at will. These vises are of same material and finish as those described on preceding page.

No. 155. Jaws 2¼ in. Opens 2½ in. Weight 5½ lbs. **Price $1 10**

No. 156. " 2¾ in. " 3½ in. " 9 lbs. " 1 60

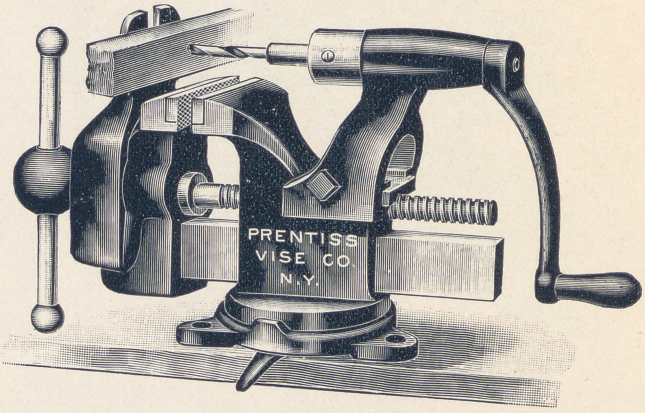
Handy Drill Attachments.



PATENT APPLIED FOR.

For New Shepard Vises.

This is the only drilling attachment that can be securely fastened to vise, thus enabling operator to do as perfect work as with expensive post or bench drill.

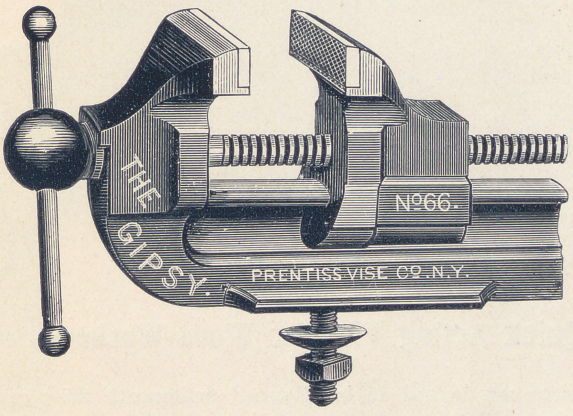
Sockets are fitted for ½ and $\frac{41}{64}$ round shank drills, or for square taper shank, as ordered. Unless otherwise instructed, we send ½ inch round socket.

Drill Attachment for Vise No. 62 and No. 162, Price $2 00

Drill Attachment for Vise No. 63 and No. 163. Price $2 50

"GIPSY."

(TRADE-MARK.)



To supply the growing demand for a strong, cheap, handy vise for common uses, we have added to our list the above implement which we think is in every way suitable for the purpose. It is made of good material, with steel screw and welded steel jaws milled and cut, is strong, convenient, of ample weight and cheap. Head of swivel screw moves in groove running whole length of bottom plate, allowing operator to move vise out, in, or to any desired angle and fasten in position.

The nut is made by a long, full thread cut in solid metal of back jaw.

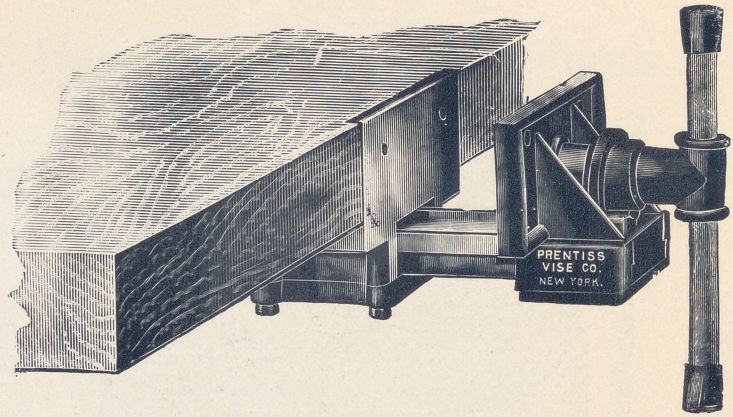
These vises are handsomely painted and polished, and are finished equal to any first-class vise in market.

No. 65. Jaws 2½ in. wide. Opens 3 in. Weight 8 lbs. Price $1 75

No. 66. Jaws 3½ in. wide. Opens 4 in. Weight 14 lbs. Price $2 50

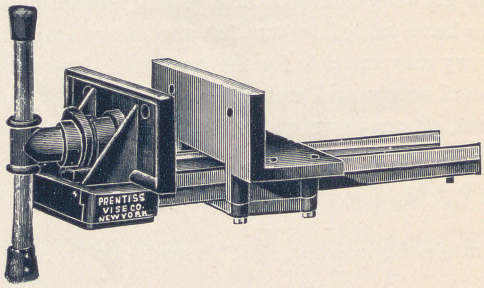
No. 67. Jaws 4 in. wide. Opens 6 in. Weight 28 lbs. Price $4 00

The Blake
CABINET-MAKERS' VISE.



Quick Acting Vise for Wood-Workers.

These vises are devised to be fastened underneath the work-bench, leaving jaws flush with top, and they are adapted to holding every description of wood-work.



They are the strongest, simplest and best rapid acting vises ever offered for the special use of Wood-Workers. Instant adjustment, quick release, no lost time. Guaranteed superior to any other.

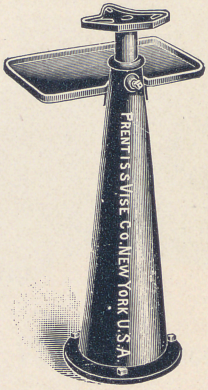
ADJUSTABLE
COLUMN AND TOOL TABLE.



This is a heavy, rigid Iron Column, to be securely bolted to the floor, for supporting a Vise of such size and style as may be desired.

The Iron Column or Stand can be adjusted to any suitable height, and is furnished with Tool Table of ample size to conveniently hold all necessary tools.

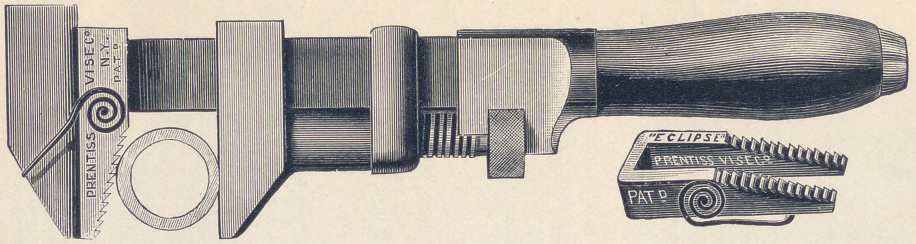
With this device it is possible to place Vises wherever desired, throughout a shop, independent of the work benches. It is often necessary, and always desirable, to have a Vise near large Machine Tools, as it saves the operators much time and labor.

We carry in stock Column fitted for our No. 2 and No. 19 Prentiss Vises, and can promptly supply other sizes on order.

Price of Column, with Tool Table, ... $6 00

Weight, . . . 60 pounds.

"Eclipse" Wrench Attachment.



This little article, which is readily slipped on or off a wrench, will instantly convert **any ordinary Screw Wrench** into a **first-class Pipe Wrench,** capable of doing all the work required of such a tool.

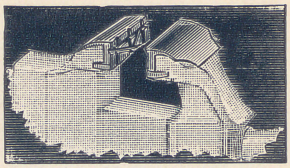
The Bingham VISE-JAW CAPS.

PATENTED JULY 7TH, 1891.



These indestructible malleable iron Caps will fit any vise and are intended to protect finished work when clamped in a vise, and also for holding securely, without injury, finished rods of any shape, round, oval, square or polygonal, for which latter purpose grooves of various sizes, and disposed at various angles, are provided. For holding the shank of a tap, when finishing out the flutes with a file, and a hundred kindred operations, these caps will be found invaluable.

When the stops at the end of faces abut against the sides of the vise jaws, the corresponding grooves in a pair of caps will be opposite each other, so that any sized cap can be used with any width of jaw; but it is, of course, preferable to have the cap the same length as the width of the jaw to which it is to be attached.

$3\frac{1}{2}$ inch, . . . per pair, 40 cents. 4 inch, ... per pair, 50 cents.

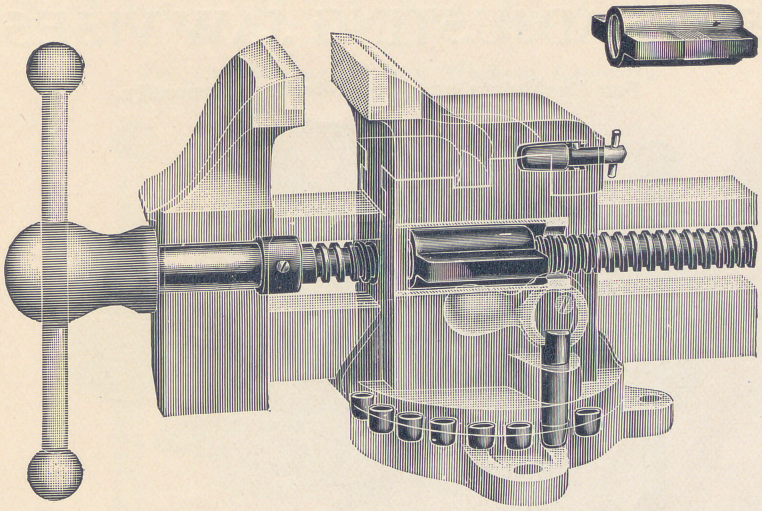
Lewis' Patent
STEEL SLIDE BAR VISES.



Our Patent Double Steel Slide Bar Vises possess many improvements which overcome acknowledged defects in other styles of vises.

The slides are two flat bars of wrought steel, the upper bar being mounted above the screw with flat surface horizontal, while the other bar is below, having flat surface in perpendicular position to screw, by which arrangement we secure perfect resistance for the jaw, against both sidewise and downward strains and at same time provide against danger of breakage.

The Steel Slide Bars Do Not Break.

The nut is fastened at centre, instead of bottom of vise, and always lines with screw, thus adding greatly to firmness of grip. The screw is well protected, but can be oiled without removing slide bars from body of vise.

We make both solid jaw vises and adjustable jaw vises, and with stationary or swivel bottom, as may be desired.

The improvement in construction of the adjustable jaw will be appreciated at a glance. The hub and supports are made extra strong. The locking-pin is placed at back of jaw, giving sufficient purchase to hold firmly with small strain on pin. The position of pin is entirely out of way, and prevents dirt from entering the hole. Loss of pin is impossible, as it is simply drawn back to shoulder, and not removed when out of lock. Only part of turn is required, after pin is pressed forward, to fasten the jaw firmly in place. The same movement reversed, unlocks, and allows jaw to adjust.

Our new Patent Swivel Bottom is made with a heavy hub, which is part of the body of the vise, and which passes through bottom plate and takes most of the strain, the bottom set-screw and washer merely holding vise down to plate. They have heavy steel side-locking pins which are moved in or out by an eccentric, which prevents their being thrown out of lock by any possible strain on the vise, but are easily adjusted when desired, and do not depend upon a spring. This makes the strongest and most convenient Swivel Bottom yet devised. All our vises are made of the best material, and are strictly first-class in workmanship and finish.

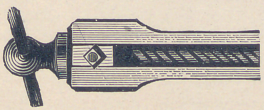
NOTICE.

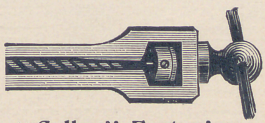
In ordering repair parts to replace breakages in our vises, PLEASE DO NOT SEND US THE BROKEN PART ALONE as it is of little or no service. Send rather the BALANCE of the vise (ALL THE GOOD PARTS), which will secure the accurate fitting of the part required. In most instances, and where no other service is necessary beyond supplying a properly fitting replacement, we make no charge except for the part supplied; and in any case, if further repairs or adjustments are found desirable the charge for such service will not be excessive.

GOODS RETURNED for repair or credit must be sent to FACTORY, WATERTOWN, N. Y.

In ordering new front jaws for vises, state style of vise, always give the size (square) of the sliding bar of jaw, and also state whether the broken part has "Dog" or "Collar" style of fastening, for holding in the screw, as shown in following cuts:



"Dog" Fastening.



"Collar" Fastening.

Dealers are cautioned against taking parts from vises they have in stock, for although the extra parts we furnish are as nearly "interchangeable" as is practical, and are satisfactory for fitting to a vise in *use*, they are not calculated to replace parts taken by dealers from *new* vises in their stock.

For convenience of those who wish to order by wire, we have adopted the following

Telegraphic Code.
